Dear Susie:

In the United States, There Is No King—Except the One No One Talks About

"In the United States, there is no king," reads the DEI lawsuit against President Trump from the National Association of Diversity Officers in Higher Education. But there is a king in the United States. His name is John Roberts, and his throne is the Presiding Officer of the U.S. Judicial Conference—not the Chief Justice of the U.S. Supreme Court.

Like FDR, who studied authoritarian legal strategies—including those used by Hitler—judicial administration became his path to controlling the courts. Not one Republican or Democratic individual legal scholar or think tank has exposed Roberts' administrative power as the presiding officer of the U.S. Judicial Conference. No member of the Senate or House will admit that Roberts and his hand-picked members of the Judicial Conference have absolute control over the regulation and administration of both the Rules Enabling Act and the Judicial Conduct Act.

Even President Trump's most conservative appointee, Fifth Circuit Judge James Ho, will not expose how Roberts' total control of both judicial conduct and policymaking, and how he can and does allow federal judges to act without accountability or appealability. Ho will not state the simple truth:

Judges that Roberts protects use the *Judicial Conduct Act* to shield the most leftist judges—because the left is in the business of fabricating destructive and prejudicial *post-modern* rights.

Even Ho—who has come close—is not even close at all to exposing King Roberts. He has openly stated that Biden's immigration policy is an invasion. He has said that "racism is edgy and exciting—so long as it's against whites." He resigned from the Federal Judges Association after condemning its recent statements as polarizing, hypocritical, and sanctimonious. But even Ho will not expose King Roberts.

We have.

Here is What We've Discovered—And What Comes Next

The Federalist Society's Role in Judicial Corruption

It was not the radical left that co-opted the *Judicial Conduct Act*. It was the Federalist Society; during the Reagan administration, they turned both the Act and *Roe v. Wade* into a billion-dollar racket that protects judicial misconduct instead of prosecuting it. They did this even though Carter signed it specifically to provide a process to vacate *Roe v. Wade* and efficiently impeach federal judges or a group of federal judges. The Democrats themselves passed it days before Reagan's landslide victory.

Roberts' 2024 Annual Report: Using the Fabrication of Marbury Against Trump

In his 2024 Annual Report, Roberts issued a direct threat to President Trump, invoking *Marbury v. Madison*—a product of the Federalist's "Midnight Judges" scheme, the greatest judicial fraud in American history. The Federalist's judicial ideology was defeated so thoroughly by Thomas Jefferson that it quickly died. But Federalist lawyers resurrected it to betray Reagan and the *Judicial Conduct Act*.

Acting with confidence rivaling the boldest power grabs in American history, Roberts has affirmed his belief that the judiciary holds supremacy over the Constitution itself—not just over the executive and legislative branches, but over the entire democratic system. And now, he is proving it again.

Judge Boasberg is not just another leftist judge—he was Roberts' personally selected enforcer on the FISA Court, signing off on fraudulent surveillance warrants against President Trump's campaign. As our attached exhibit documents, Boasberg enabled the Russia collusion hoax, protected the DOJ's abuse of FISA, and helped shield deep-state actors from accountability. Now, Roberts is once again defending him—because Boasberg is part of the machine Roberts built to sabotage Trump.

No one in the Republican Party has challenged him. We have.

Who We Are

Our founder, Manuel P. Asensio, successfully designed and executed an investigation into Roberts' conduct at the U.S. Judicial Conference and formally joined Roberts in a *Judicial Conduct* case he cannot escape—a master plan that no other Republican organization has conceived much less executed.

We own and operate ELIOR, a private AI-driven structured as a mass-language database covering all matters related to the efficient regulation of judicial conduct that:

- Traces judicial discipline from biblical law to English law, the American Revolution of 1800, the Adams-Marshall Midnight Judges scheme, Jefferson's counterattack, FDR's court-packing scheme, and *Roe v. Wade*.
- Includes all aspects of Mike Pence's role and the federal judiciary's handling of the 2020 presidential election crisis, exposing whether their actions upheld the Constitution or were driven by bad faith.
- Documents how the Federalist and the U.S. Judicial Conference have fabricated judicial independence doctrine arguments, including *Marbury v. Madison*, to undermine the Constitution and the *Judicial Conduct Act's* authority.
- Reveals how the Federalist Society has deceived Republican leadership into believing that judicial misconduct is untouchable.
- Contains the Judicial Conduct Act's entire legislative history and U.S. Supreme Court decisions expanding judicial authority.
- Includes cases that inexorably expose Roberts' use of judicial misconduct to take over the regulation of private liberty that is the most deeply rooted in principles, moral standards, and scientific biological facts—that supersede the whims of bureaucrats or judicial political ideology.

We are the only Republican organization openly opposing the Federalist Society and judges acting as administrator in both Florida and Washington, D.C.

We are Republicans actively defending the Constitution against the Federalist Society's army of lawyers and political operatives, which are embedded within the Republican Party of Florida and the Republican National Committee.

What Is Our Plan for Trump?

St. Johns GOP and ELIOR are the only entities in the nation with the facts, knowledge, and structure to dismantle the corrupt Washington, D.C. bureaucracy that the Federalist have created through the *Judicial Conduct Act* and replace it with a real judicial discipline system that protects the Constitution. ELIOR and St. Johns GOP aren't just critics; they have the facts and strategies to fix the problem.

Roberts is acting with remarkable audacity because of the Federalist Society's decades-long disinformation campaign to disqualify the *Judicial Conduct Act*. This is why no one from the Federalist Society, the Republican National Committee, or the Republican federal judiciary in D.C. or Florida establishment will debate our founder—they can't.

"With our work and information, Trump can do what Thomas Jefferson did—he can win in Congress and dismantle the judicial tyranny Roberts has built.

When Chief Justice John Marshall retaliated against Jefferson with his *Marbury* doctrine, Jefferson ignored him. He refused to give Marshall and his fabricated doctrine the legitimacy the Federalists craved. Instead, he won in Congress and forced Marshall and his Federalist judges out of Washington—sending them to the districts, on horseback or in a stagecoach.

Yes, because of Jefferson's success in dismantling Federalist court reforms, Chief Justice John Marshall was forced to ride circuit—meaning he had to travel by horseback or stagecoach to preside over cases in the lower courts.

Marshall hated circuit riding and described the physical toll in letters, noting that the journeys were exhausting and the conditions difficult. This was a deliberate humiliation for Marshall and the Federalists, as they had tried to eliminate circuit-riding as part of their judicial power grab.

Yet Roberts had the audacity to distort Marshall's saga as a veiled threat against Trump — believing he could rewrite history and weaponize it against him.

Using our work, Trump can achieve a Jeffersonian victory in Congress.

The Next Step: A Real Republican Judiciary Policy

The time has come for Republicans to break free from the Federalist Society's corrupt grip on judicial policy, expose Roberts' fabricated doctrines, and enforce true constitutional judicial accountability. It is time for Trump to join us in our battle against Roberts.

We welcome an invitation to speak to you separately or with President Trump.

Very truly yours,

Robert A. Harris

Enclosure: Exhibit – Boasberg's Role in the Russia Collusion Investigation & FISA Cour

Boasberg's Role in the Russia Collusion Investigation & FISA Court:

1. Boasberg was a key judge on the Foreign Intelligence Surveillance Court (FISA)
 - He played a role in approving surveillance warrants, including those targeting Trump campaign advisor Carter Page.
 - The FISA process was later exposed as corrupt, with significant evidence showing that warrants were obtained using false and misleading information related to the Steele dossier.
2. Boasberg was involved in covering up FBI abuses in the FISA process
 - He minimized the consequences when it was revealed that the FBI knowingly provided false information to obtain a FISA warrant on Page.
 - Rather than holding intelligence officials accountable, he gave minimal penalties to those who lied to the court.
3. Boasberg was appointed to the FISA Court by Chief Justice John Roberts
 - This reinforces Roberts' direct involvement in judicial manipulation—he hand-picked judges like Boasberg, who were instrumental in the Russia collusion hoax.
4. Boasberg also handled cases tied to the Mueller probe
 - He protected Democrat-aligned entities and helped block full transparency into the DOJ's handling of Russia collusion investigations.

How This Connects to the Latest News About Roberts Defending Boasberg

- Roberts is once again protecting a judge who was key in enabling the Russia collusion hoax.
- Boasberg is not just a regular judge—he was instrumental in using the FISA court to justify the FBI's surveillance of Trump's campaign.
- Trump's call to impeach Boasberg is justified based on his past misconduct, but Roberts is trying to shield him under the false pretense of 'judicial independence.'
- This confirms Roberts' pattern: he handpicks judges to execute political corruption and then shields them from consequences.
