

## Clairia Playbooks: Guide AI to Investigative Outcomes You Can Trust

When investigations need to be thorough and consistent, don't leave outcomes to chance with AI tools that aren't designed for the job. Built into the industry-leading investigative AI assistant, Clairia, *Playbooks* puts the controls in your hands to keep AI responses on track towards the outcomes you can feel good about. Create and tailor *Playbooks* to support any part of your investigation, whether for specific teams, workflows, or regions. You set the rules and guidelines on how AI should behave and respond, and it follows your lead.

### AI Shaped by the Standards You Set

Create and tailor *Playbooks* for any investigative scenario to deliver reliable, relevant AI responses for case managers. Powered by the guidelines, instructions, and context you define, *Playbooks* helps drive defensible outcomes without generic responses.

### Built with AI Governance in Mind

Make AI a trusted tool teams can feel confident using, through the safeguards and permissions you set. Whether through open chat or within the boundaries of *Playbooks*, you can standardize how AI is used, bringing consistency to investigations without adding complexity or risk.

### AI Trusted by Fortune 500 Leaders

Global leaders rely on tools that can be configured to meet the highest standards - that's why they trust Case IQ. With *Playbooks*, we're bringing that same renowned configurability to AI, supporting complex investigations with greater efficiency, reliability, and readiness for what's next.
