

Contract Performance Management

Connect commitments to spend, pricing, products, invoices, inventory and vendors.

Contract Performance Management (CPM) is PostSig's system for controlling vendor spend, renewals, invoices, usage rights, obligations and drift — connecting commitments to pricing, products, inventory and vendors as terms change.

The hard part isn't finding the record. It's knowing what applies now.

LineageAI connects contracts, invoices, products, inventory, vendors and usage to track:

Four ways into commercial performance.

See what you should pay, use, renew and manage — across spend, inventory, products and vendors.

Vendor Relationships

Manage the full vendor relationship.

Bring spend, renewals, obligations and usage together to find leverage.

One governed intelligence layer for every way you put it to work.

Start in an approved environment, run PostSig tools and skills, build from what applies now, and extend the same governed intelligence into dashboards, reports, applications and workflows.

Start where your team works.

Use intelligence the way your team needs.

Build around your business without losing control.

Authenticated

Every request is tied to an approved user, application or agent.

Permissioned

Tenant, record, document and user-level access stays intact.

Scoped

Requests run against an explicit CPM or IRI data set.

Source-backed

Current terms, citations, calculations and lineage stay attached.

Auditable

Requests, tools, outputs and access state remain traceable.

Bring your next workflow to PostSig.

Show us the question, decision or process you want to improve.
