PP Teck Brings Professionally Applied Tire Puncture Protection to the U.S. With Live Demo Launch Week Near Charlotte, Nov. 16–20

Thursday, 05 November 2026 04:35 PM · Topic: Product Announcements

Media, tire professionals and fleet operators can now book sessions at PP Teck's Fort Mill, S.C. headquarters to watch a live puncture demonstration and see the treatment applied.

FORT MILL, SC / ACCESS Newswire / November 5, 2026 / PP Teck, a tire puncture-protection company new to the U.S. market, will introduce its professionally applied treatment during U.S. Launch Week, Nov. 16-20, 2026, at its headquarters in Fort Mill, S.C., just south of Charlotte. Reporters, automotive creators, tire service businesses, dealers and fleet operators are invited to book a time to see a tire punctured on-site and watch how the technology responds.

PP Teck's treatment is a nano polymer coating sprayed inside the tire by a trained, certified applicator using PP Teck equipment. It is not a liquid sealant. The coating is designed to seal qualifying punctures and help the tire hold pressure, so drivers and fleets can keep moving instead of stopping on the roadside.

A flat tire costs more than a tire. For families it can mean a dangerous stop on a busy shoulder. For fleets it can mean a missed delivery, an idle driver and a lost day.

For dealers and service centers, PP Teck is more than another add-on. It gives customers back the time a flat takes out of their day and helps keep them and their families off the shoulder of a busy highway. That makes it a service shops can stand behind, and one their customers remember.

Media: book a live demo

Media slots run Nov. 16-20, between 10 a.m. and 8 p.m. daily. Crews can film a live puncture demonstration, capture the application process and interview the PP Teck team on-site. Reserve your media slot.

Tire professionals and fleets: book a Launch Week session

PP Teck is building its U.S. network of certified applicators, service centers, dealers and fleet partners. Launch Week sessions include:

- **Certified Applicator sessions:** see the equipment, the application process and the business opportunity.
- **Installer, Service Center and Dealer sessions:** learn how PP Teck can become a new service offering for customers.
- **Fleet and Commercial demos:** see how the treatment fits vehicle availability and downtime planning.

Appointments are limited. Businesses that call or book during Launch Week can learn about a special offer on PP Teck equipment and nano polymer. Reserve a session at www.ppteck.com/launch or call 839-282-4424.

Drivers interested in getting their own tires treated can learn more at www.ppteck.com.
