SSOGEN

SSOGEN 4.5 at a glance

Single sign-on for AI agents, people and every application, on your own servers or hosted.

New in 4.5

- **AI agent identity.** Every agent has a human owner, credentials that expire within minutes, consent from the person it acts for, approval for sensitive actions and a kill switch. ssogen.ai/ai-agent-identity/
- **MCP gateway.** Each tool call an agent makes is checked for identity, scope and approval before it reaches the tool. ssogen.ai/mcp-gateway/
- **Customer and partner identity.** Invite partners, let customers register with approval and bot protection, or accept their own identity provider. ssogen.ai/customer-identity/
- **Access without a VPN.** Internal web apps and servers open in the browser behind sign-in, MFA and policy, through your own gateway. ssogen.ai/access-without-a-vpn/
- **SCIM provisioning.** Users and groups from Active Directory, LDAP, SAML, OpenID Connect, SCIM or CSV. ssogen.ai/ssogen-directory/
- **Phishing-resistant sign-in.** Passkeys, number-matching approvals, authenticator codes and one-time email links, per application. ssogen.ai/mfa/

Products

- **Identity Provider:** SAML and OpenID Connect for people and agents. ssogen.ai/identity-provider/
- **Web Agent:** SSO and MFA for Apache and Oracle HTTP Server apps, no code changes. ssogen.ai/web-agent/
- **Gateway:** SSO, MFA and policy in front of internal apps. ssogen.ai/gateway/
- **Authenticator:** approvals by face or fingerprint; offline codes. ssogen.ai/authenticator/
- **Directory:** users, groups and attributes from every source. ssogen.ai/ssogen-directory/

Oracle and ERP

- **Oracle E-Business Suite 12.2:** Oracle Validated Integration. ssogen.ai/oracle-ebs-sso/
- **PeopleSoft:** SSO with Entra ID, Okta, AD FS or SAML. ssogen.ai/peoplesoft-sso/
- **JD Edwards:** SSO through the web server in front of EnterpriseOne. ssogen.ai/jd-edwards-sso/
- **Legacy access managers:** replace them one application at a time. ssogen.ai/migrate-from-legacy-access-managers/

Deployment

- **Self-hosted or hosted:** your Enterprise Linux servers, or an organization SSOGEN hosts. ssogen.ai/deployment/
