

THE NEW FULL ALUMINUM BENCH SEV//ENNE

Introducing the **CELETTE Full Aluminum Bench Range**,
a revolutionary product designed to elevate your workshop experience.
This new bench offers several **notable advantages**:

- 1. Lightweight and Maneuverable:** Crafted from high-grade aluminum, the bench is significantly lighter than traditional options, making it easy to transport and adjust.
- 2. Durability and Resistance:** Engineered to withstand impacts and deformations, the aluminum construction ensures long-term performance in demanding environments, ideal for industrial and automotive applications.
- 3. Eco-Friendly:** Being 100% recyclable, aluminum helps reduce environmental impact while contributing to increased efficiency in body shops.
- 4. Aesthetic Appeal:** The sleek design mimics traditional benches but offers a modern and elegant finish, enhancing the visual appeal of your workspace.
- 5. Ergonomic Design:** Its lightweight nature promotes ease of use, ensuring comfort for workers during operations.
- 6. Safety Features:** Designed for safe use in aluminum bay areas, particularly when using aluminum welders.

The **CELETTE Full Aluminum Bench Range** combines **lightweight construction, durability, aesthetic appeal, and environmental respect**, making it a smart choice for various applications. Experience the perfect blend of form and function, backed by CELETTE's legacy of excellence.

Transform your workspace today and discover how our innovative benches can drive your success forward!
